

Milesight-Troubleshooting

How to use MSPlayer

MSPlayer Version	V2.4.0.3 (64-bit)	Update	2021.11.30
-------------------------	--------------------------	---------------	-------------------

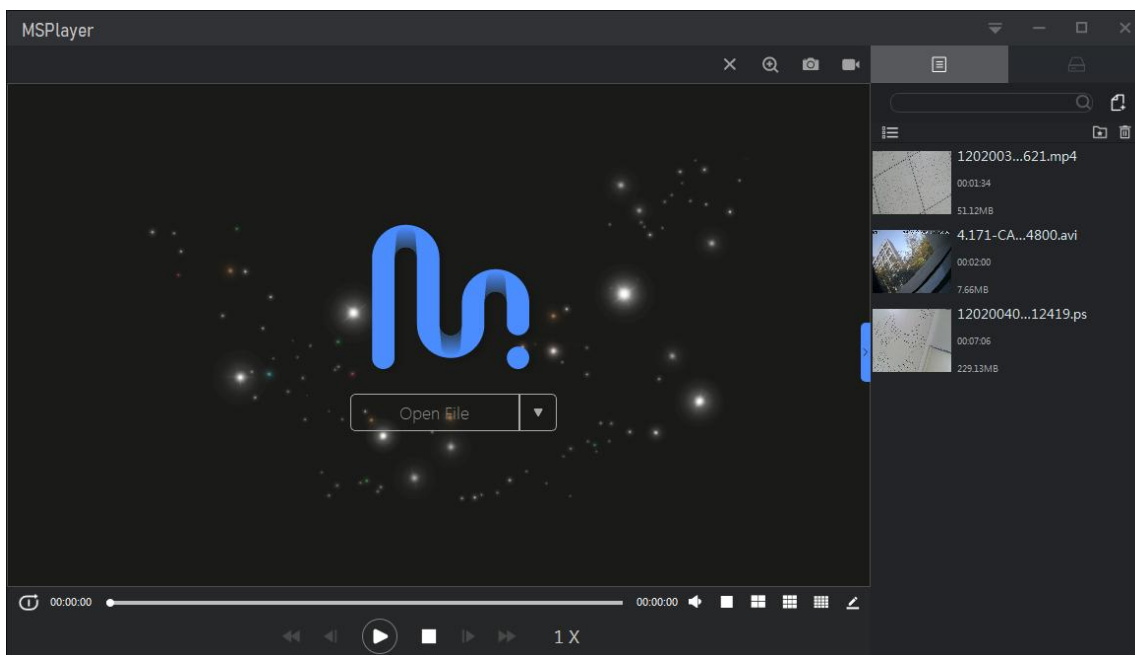

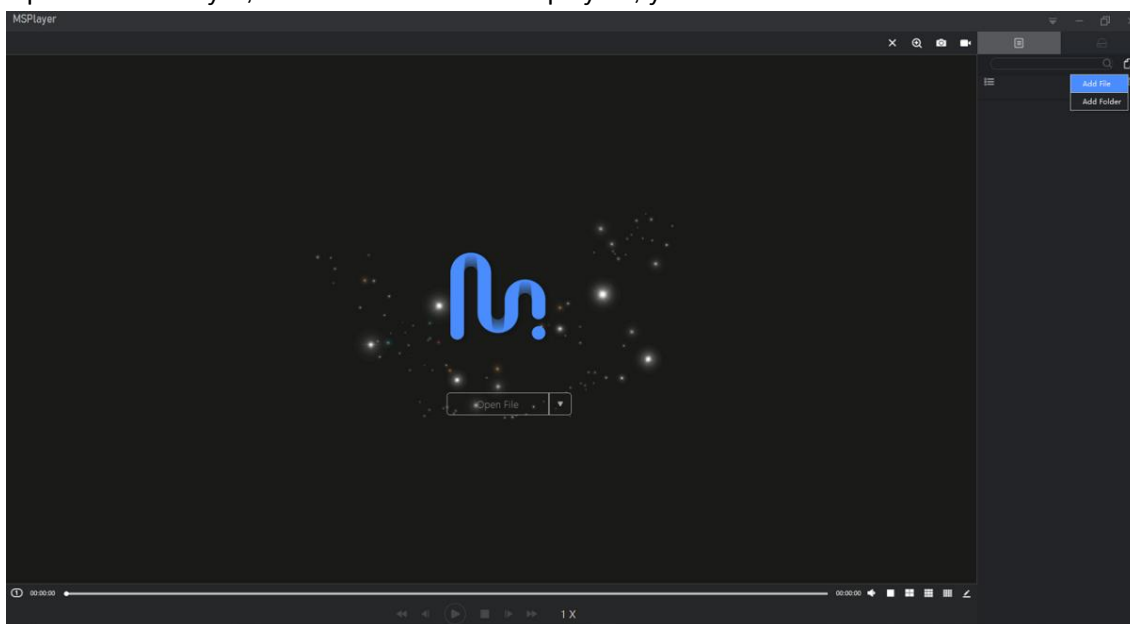

1. Introduction

In order to protect system security integrate with Milesight products better. Milesight developed a simple player for users to play files.

2. How to use MSPlayer

2.1 Playlist

Open the MSPlayer, the default interface is playlist, you can click  to add file or folder.

Note:

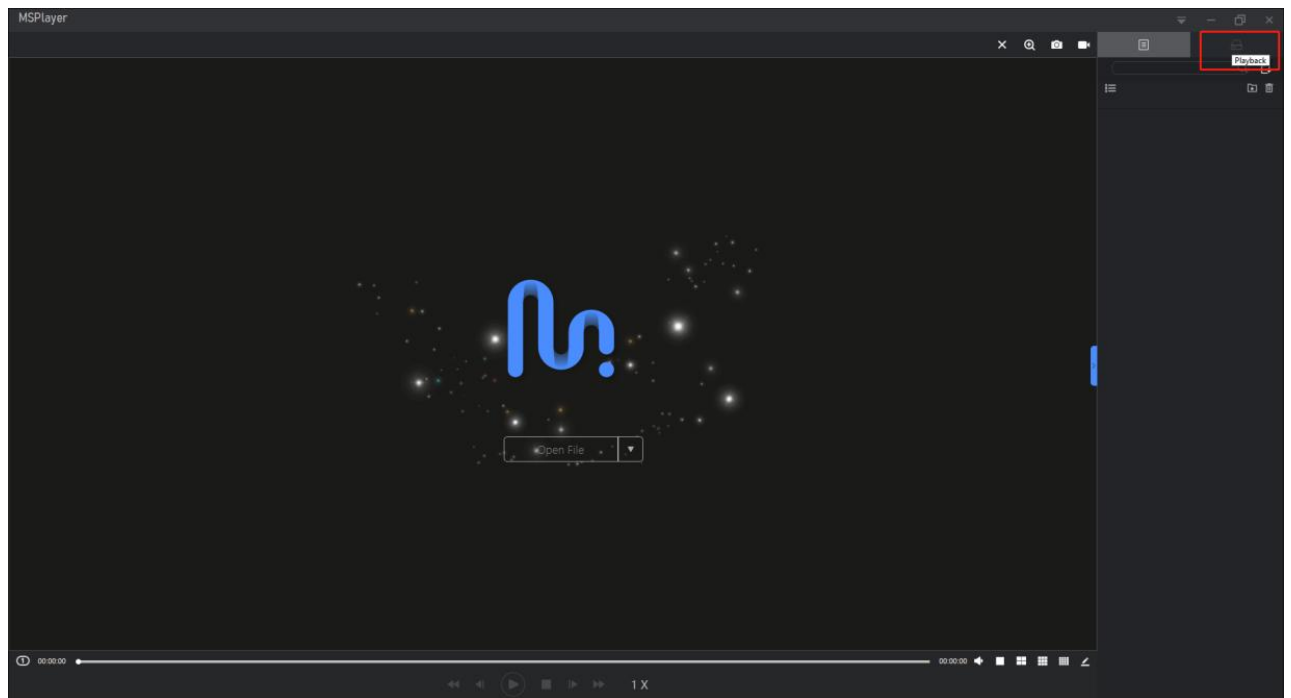

MSPlayer only supports files in "avi, mp4 and ps" format.

2.2 Playback

User do not need download the files from Milesight Network Camera or Network Video Recorder, the source file can be played directly in the MSPlayer.

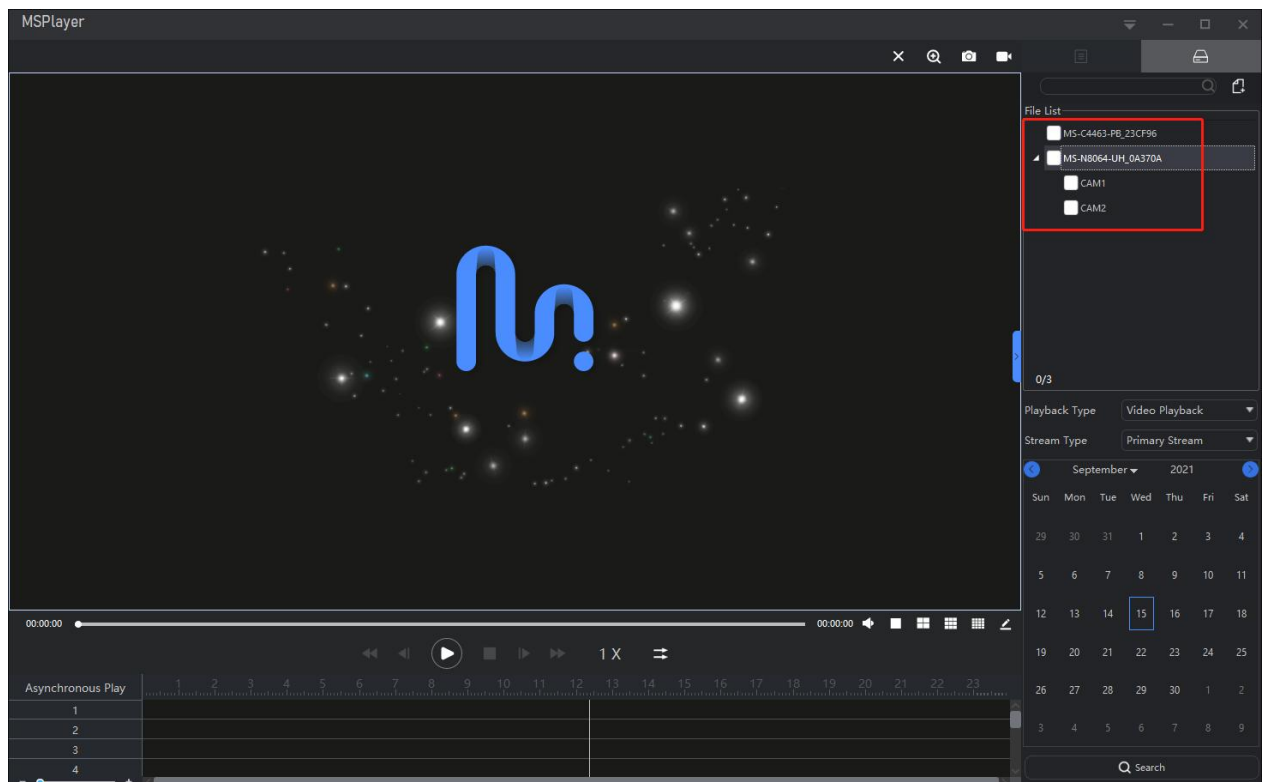

Note: The“mp4”file of the Milesight source file is not real“mp4”file, not compatible with the third-party players.

Step 1: Open the MSPlayer, Click the top right  button to enter the Playback interface.

Step 2: Click the  button to add folder. The name convention for Network camera or Network video recorder folder is“model + the last six digits of MAC address”.

Note:

1. If you unfold the NVR file section, it will display the channel's number below.
2. You must add the entire source folder, the contents of the folder must contain key files such as video source files, bin files, separated files are not supported.

	m0000000.mp4	9/17/2021 ...	MP4 Video File (VLC)
	m0000001.mp4	9/17/2021 ...	MP4 Video File (VLC)
	m0000002.mp4	9/17/2021 ...	MP4 Video File (VLC)
	m0000003.mp4	9/17/2021 ...	MP4 Video File (VLC)
	m0000004.mp4	9/17/2021 ...	MP4 Video File (VLC)
	m0000005.mp4	9/18/2021 ...	MP4 Video File (VLC)
	m0000006.mp4	9/17/2021 ...	MP4 Video File (VLC)
	m0000007.mp4	9/17/2021 ...	MP4 Video File (VLC)
	m0000008.mp4	9/18/2021 ...	MP4 Video File (VLC)
	m0000009.mp4	9/18/2021 ...	MP4 Video File (VLC)
	m0000010.mp4	9/18/2021 ...	MP4 Video File (VLC)
	m0000011.mp4	9/22/2021 ...	MP4 Video File (VLC)
	MDISK0.bin	9/16/2021 ...	BIN File
