

# Milesight & AxxonSoft's Integrated Security Solution: United for Biscuit Safety

## Introduction

Organization:  
**SOTUBI**

Partner:  
**AxxonSoft**

Location:  
**Tunisia**

Segment:  
**Industrial**

Société Tunisienne de Biscuiterie (SOTUBI), a prominent biscuit manufacturer in Tunisia, faced increasing security demands as their facilities expanded. To safeguard their operations, manage access control, and monitor critical infrastructure, they required a comprehensive and scalable security solution. To meet these needs, a fully integrated security solution was implemented using Milesight's cameras and AxxonSoft's VMS platform.

## Solution Highlights

The solution brings together Milesight's cutting-edge IP camera and Axxon One VMS - a video management software from AxxonSoft, providing SOTUBI with a robust video surveillance solution with key advantages, such as:

- Centralized Monitoring of SOTUBI's Multiple Areas**

The joint effort between Milesight cameras and the Axxon One VMS allows for scalable centralized monitoring. This enables seamless management of multiple cameras across various locations of SOTUBI factory through a single, user-friendly interface. Operators can review video footage, locate events on an interactive map, classify incidents (alarms, suspicious activities, false alarms), and add detailed comments to ensure accurate incident management.
- Real-time Video Detection for 24/7 Surveillance**

The AI VCA smart features of Milesight cameras are supported on the Axxon One VMS, including line crossing, loitering, object left and removal, and region entrance and exit, among others. These features analyze scenes and alert operators to significant events, reducing fatigue and increasing the efficiency of security staff. This ensures 24/7 surveillance of the SOTUBI factory, as several types of Milesight cameras (Dome, Panoramic, and others) have been installed throughout the facility, strategically covering all critical areas of the factory.
- Multifaceted LPR for Vehicle Entry Management**

Milesight LPR Cameras capture license plate data (plate number and plate color) and vehicle data (vehicle brand, vehicle color, vehicle type, etc.) in real-time, which is then received by the Axxon One VMS and facilitates instant logging of vehicles entering and exiting the premises. Operators can search the archives for specific license plates, export event data, and view the historical timeline of captured plates. This functionality is critical for post-incident investigations.
- Real-time Entry and Exit Monitoring & Control**

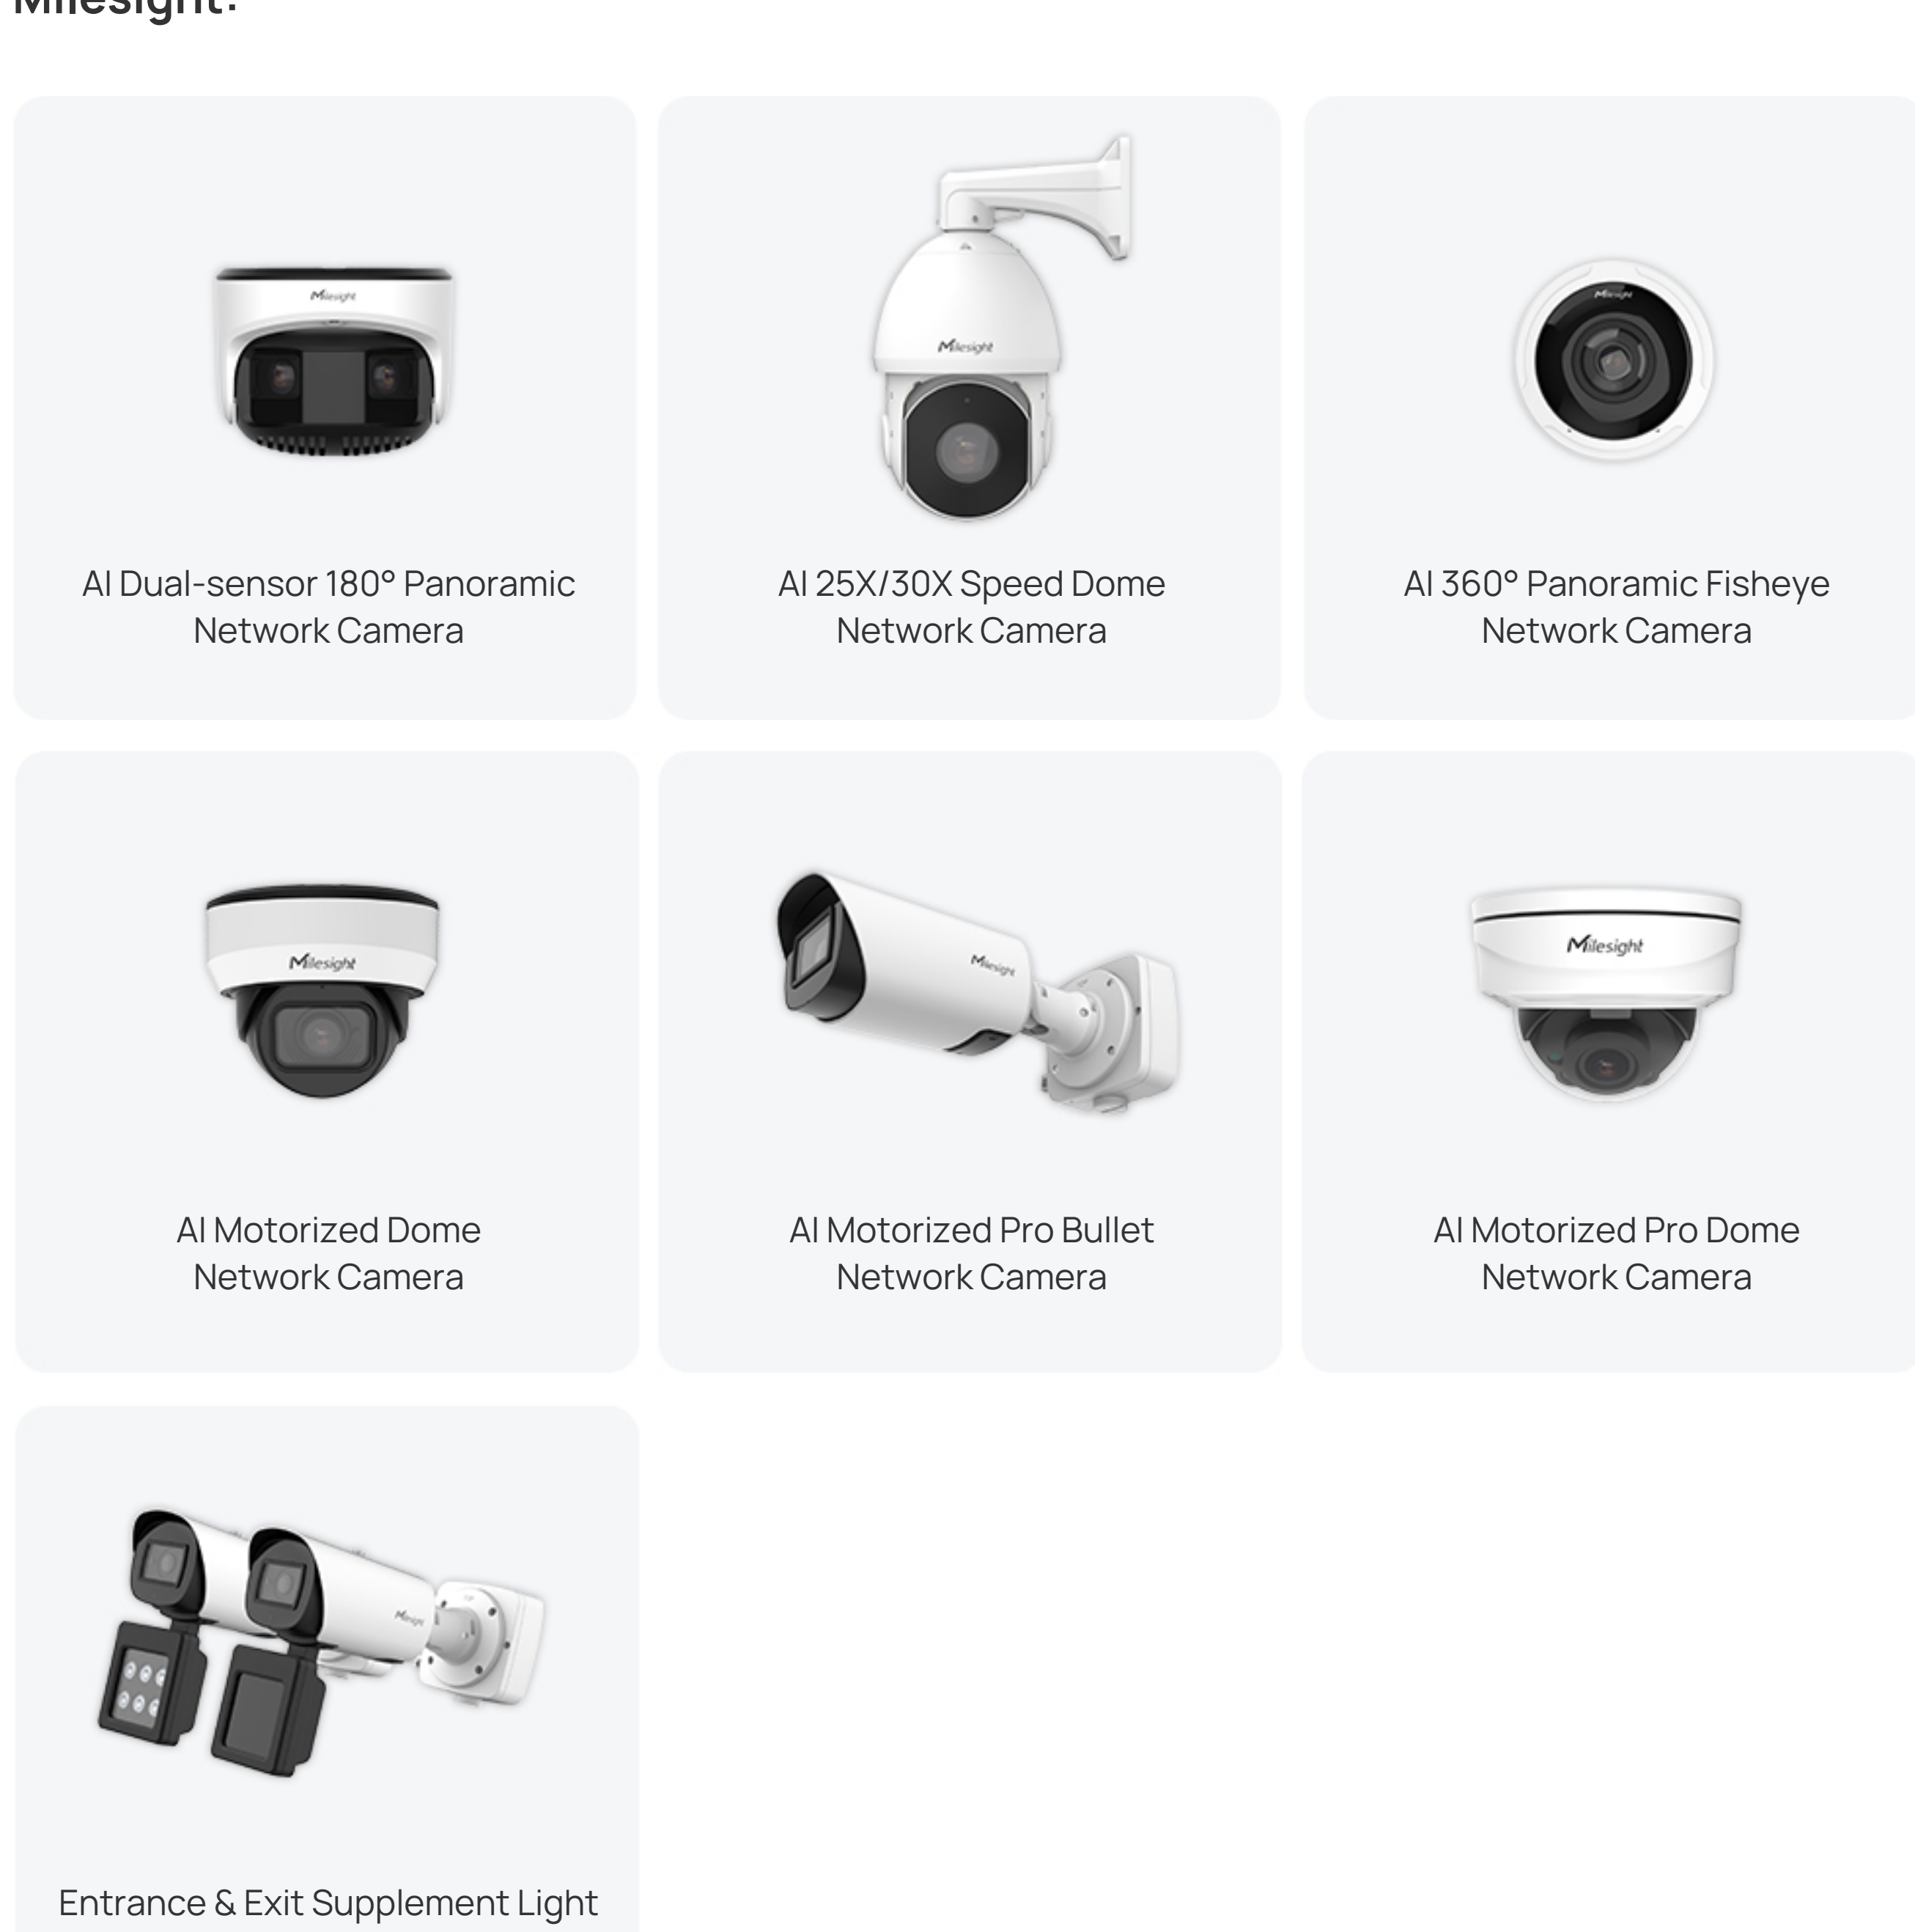

System from AxxonSoft was deployed across all entry points of the factory, seamlessly integrated with Milesight's robust IP cameras, only authorized personnel could gain access. Authorized Access management provided real-time monitoring and control of all entry and exit points, with instant intervention capabilities in case of unauthorized access.

## Result

SOTUBI's security environment is now a unified, integrated ecosystem powered by Milesight's cutting-edge cameras and Axxon One VMS. With advanced surveillance, real-time event orchestration, and seamless access control, SOTUBI now operates with enhanced security, optimized incident response, and improved overall operational efficiency.

## About Milesight

Milesight offers multi-sensing products to capture the most meaningful data and makes it accessible across diverse applications. It innovatively applies emerging technologies such as AI, 5G, and IoT to distinct use scenarios. With a commitment to making sensing matter, Milesight quickly responds to customer-specific challenges and collaborates with an expanding network of partners to deliver unique data value. It is determined to make real, positive impacts in smart buildings, intelligent traffic, intelligent security, smart cities, and beyond.

## About AxxonSoft

AxxonSoft is a software development company that offers video management software (VMS), physical security information management platform (PSIM), cloud solutions (VSaaS), and inhouse-designed customizable AI video analytics. AxxonSoft software provides best-in-class integration and customization capacity for building intelligent video surveillance and integrated security systems of any scale and for diverse industries.
