KEY FEATURES

AI-Powered Precision Sensing Integrating **PIR** and **AOV (Always-on Video)** technology, the system achieves an industry-leading sensing range of **up to 30m**. By utilizing **Edge-AI secondary filtering**, it intelligently excludes irrelevant motion—such as animals, foliage, or light changes—to focus strictly on targets that matter for perimeter security.

Wire-free 4G Solar Deployment Designed for remote areas without power or network infrastructure. This all-in-one system combines **4G LTE connectivity with high-efficiency solar power**, enabling rapid, 100% wireless deployment in any outdoor perimeter.

Superior 4MP Low-light Imaging Equipped with a **1/1.8" large sensor** and **F1.0** aperture, the camera captures more light to ensure sharp 4MP resolution. It delivers transparent, low-noise imagery with rich details, providing reliable visual evidence for day and night monitoring.

Ultra-low Power Design Engineered for extreme energy efficiency with a standby power as low as **38mW**. With three flexible power modes and high-capacity battery support, the system ensures **year-round 24/7** autonomous operation even during prolonged overcast periods.

Multi-Dimensional Sensing Integrated with GPS and multiple sensors (Light, Sound and Temperature) for comprehensive spatial awareness, anti-masking, and anti-theft protection.
