

Milesight Empowers Large-Scale Smart City Security Upgrade in Brazil

Milesight

Location

Brazil

Milesight Technology Partner

Digifort

Overview

The Government of Pernambuco, Brazil, has launched the Smart City Security Project, led by one of Brazil's leading security integrators, with **Digifort** as the technology partner. The multi-phase project aims to build a scalable intelligent video surveillance network, with **1,752 Milesight AI cameras already deployed** and centrally managed via Digifort VMS for live monitoring, LPR, event handling, and rapid video search.

Solution Highlight

- **Comprehensive Coverage with Milesight CCTV**

To ensure every corner of the city is under reliable surveillance, 1,752 Milesight AI cameras were strategically deployed across different areas, such as: intersections, main streets, key city entrances and checkpoints, etc.

- **Centralized Management with Digifort**

All cameras are unified under Digifort VMS for live monitoring, LPR, event handling, and rapid video search.

Project Highlight

- Early-stage involvement & co-planning
- Customized solution design
- Strong commercial support & channel protection
- Fast response & technical validation
