

Empowering Toll Road Operations in Indonesia

Location

Indonesia

Overview & Challenge

Milesight has supported a leading system integrator in Indonesia's toll road industry in deploying over 300 AI-powered LPR cameras across major toll roads in Indonesia. These deployments serve the state-controlled toll road operator that manages approximately 73% of the country's toll road network, and plays a pivotal role in shaping Indonesia's intelligent transport systems.

Solutions & Products & Benefits

LEARN MORE

- **ETC Access Control:** Entrance & Exit Supplement Light Camera Enables accurate vehicle-RFID verification and improves tolling precision
- **Highway Surveillance:** Speed Dome / PTZ Bullet / Radar LPR Cameras Provide 24/7 high-speed monitoring with long-range zoom, AI analytics, and all-weather performance.
- **Application Highlights**
 - $\geq 98\%$ LPR accuracy, enhanced fraud prevention via RFID + LPR cross-verification
 - Consistent imaging in low light & harsh conditions
 - Smart vehicle search & event retrieval
 - Accurate traffic flow analysis & real-time statistics
 - Seamless integration with INTRACS's proprietary Intelligent Traffic and Revenue Control System
