

Milesight Empowers Smart City Surveillance in Topoloveni City, Romania

Milesight

Location

Topoloveni City, Romania

Overview

Milesight deployed an advanced AI-powered surveillance solution in Topoloveni City, Romania, featuring **209 Milesight AI cameras—including PTZ, Panoramic, ANPR models, etc**—to enhance monitoring of high-risk areas and strengthen the city's overall crime prevention and control efforts.

Solutions & Products & Benefits

Solution Highlights

- **Strategic Deployment Across the City**

Panoramic, PTZ, and ANPR cameras are strategically placed to ensure full coverage—from plazas and intersections to main roads and city entrances.

- **AI-Enhanced Monitoring for Smarter Oversight**

AI analytics enable automatic license plate recognition, crowd behavior detection, and intelligent PTZ tracking to support real-time incident response and reduce false alarms.

- **Reliable Operation in Remote and Sensitive Areas**

Fixed cameras and solar-powered units provide continuous monitoring at illegal dumping sites and ECO-INSULE zones, even without grid power.

- **Seamless Connectivity and Centralized Control**

All 209 cameras are integrated into a unified management platform, supported by a fiber optic and radio network, ensuring stable data transmission and coordinated response from the Central Dispatch Center.
