

Milesight National Defense Authorization Act Compliance Statement

MILESIGHT National Defense Authorization Act Compliance Statement

Background

The United States government passed the John S. McCain National Defense Authorization Act for the 2019 fiscal year on August 13, 2018 (NDAA 2019). Specifically, Section 889, which is focused on telecommunications and video surveillance services or equipment, emphasizes a perceived risk of cybersecurity and its potential effect on security and video surveillance. It also imposes restrictions on video surveillance system procurement and deployment for existing and future US government agencies.

Milesight Statement

Milesight is committed to providing NDAA (National Defense Authorization Act) compliant products that do not use or deploy critical components including SoCs produced by NDAA-banned component vendors.

Milesight products are recommended for enterprises and critical applications where compliance is essential, such as government, defense, campuses, retails, and a range of commercial applications subject to the NDAA.

Milesight NDAA Compliance Product List will be regularly updated on the Milesight website (<https://www.milesight.com/security/product/ndaa-series>).
