3. What's new

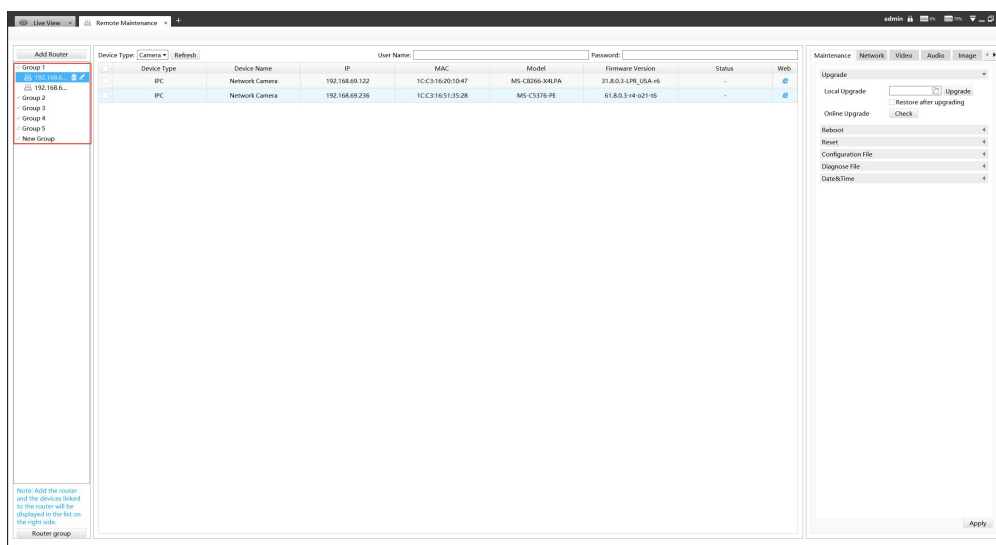

3.1 New Features

(1) Enhance Functionality of Remote Maintenance Page:

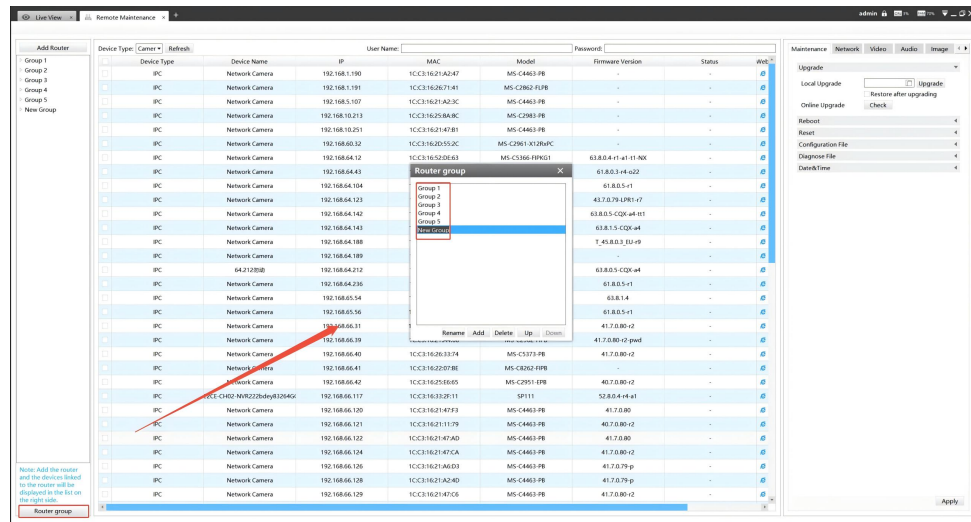

- **Add Firmware Display in the Router List.**
- ❖ This enhancement shows firmware versions directly in the router list, making it easier for users to view, identify, and manage firmware updates.

- **Add Router Group Management Functionality.**
- ❖ Introducing a group structure tree and group management functionality greatly enhances the convenience and efficiency of device management, meeting users' needs for categorized device organization.

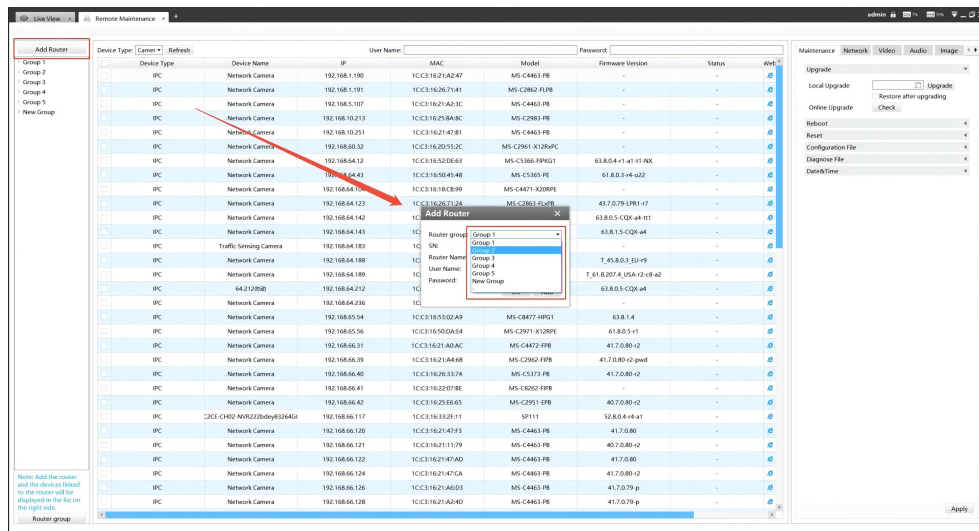

- ❖ A new “Router Group” button has been added to the bottom-left of the interface. This makes it easier for users to manage multiple routers in one place, saving time and improving setup efficiency.

Note:

Support up to 1000 groups.

- ❖ Users can also directly add routers to a group by clicking “Add Router,” simplifying the categorization and management process during router addition.

3.2 Optimization

The installer's digital signature has been updated, eliminating security warning pop-ups during installation and further enhancing the security and smoothness of the installation process.

3.3 Bug Fixed

- (1) Fixed the issue that the Advanced Motion Detection tracking box couldn't be displayed.
- (2) Fixed the issue that the camera upgrade failed.
- (3) Fixed other bugs.
