## 3. What's new

### 3.1 New Features

#### 1) Added License Plate Character Ruler

A License Plate Character ruler tool has been added to the Image Configuration interface to assist with camera installation. When enabled, a movable overlay ruler is displayed on the live view to help users align the camera so that the license plate appears at the recommended size in the frame. Specific features include:

- ❖ The ruler can be dragged freely within the live view area and resizes from the center point when adjusted.

- ❖ Height and width values (in pixels, based on 1920\*1080 resolution) can be entered manually or adjusted directly by resizing the ruler on screen.
- ❖ Default values are set to the recommended plate size: Height 60 px, Width 282 px.
