3. What's new

3.1 Optimizations

1) Optimized and compatible with new model structure to improve product applicability.

2) Optimized the reset button logic.

❖ To improve the usability of the product, the reset button logic is changed to provide more convenient and abundant reset options.

❖ The current reset button operation logic is as follows:

1) Short press the reset button (for about 1s) to restart the device.

2) Long press the reset button (for about 15s or less) until the red light is steady on and release it to reset the device.

3) Long press the reset button (for about 20s or more) until the red light flashes and release it to overwrite the existing firmware with the original firmware.
